7.2.1 – Describe at least two institutional best practices

Best Practices. Title of the Practice 01: Indigenous Medicinal plants cultivation and their practical utility for the primary ailment. Goal: Today our educational approach emphasizes the gathering of detailed information and new source and different types of data. Such new information and better communication certainly had many benefits and should be pursued in a positive manner. Right from the beginning of civilization, it has been found that certain plants in nature have medicinal values which can be cured certain deadly diseases. Ayurveda Originated in India long back in pre-Vedic period which means science of life deals with measures for healthful living during the entire span of life and its various phases. It becomes one of the oldest System. Aim: Indigenous medicinal plants and their practical utility provide comprehensive and condensed information of important medicinal plants grown in the campus used for various ailments. Thus, they form part of leading a healthy life. Conservation of precious medicinal plants not only provides genuine raw drugs for the pharmaceutical industries but also helps improving ecosystem at large extent to the medicinal plant management. The major objective of maintaining the medicinal plants in botanical garden is to supply the medicinal plant products to such persons who are interested in doing research on them. Medicinal plants are also supplied to doctors who approach us with a view of treating their patients. For the proper use of medicinal plants available in the campus, systematic training is provided to students by faculty members of Botany Department. Keeping the point in the mind that whatever the resource available is our own campus utilized for the primary ailment

The Context Describe any particular contextual features or challenging issues that have had to be addressed in designing and implementing the practice in about 150 words. The challenging issues: Medicinal plants are being natural, non poisonous, cost effective and useful as preventives and curatives. Conservation of these plants is one of the top priorities in environmental problems facing the globe. The medicinal garden is extremely useful to the people who believe in folk medicines, research field, scientists, cultivators and other user groups. It helps raise awareness of medicinal plants as an important source to the students and young scientists. The production of significant medicinal plants is an essential need of the hour. The Practice: Describe the practice and its implementation in about 400 words includes anything about this practice that may be unique in the Indian Higher Education. Please also identify constraints or limitations if any. Many forms of alternative medicines are available for those who do not want conventional medicine, have been existing in India for thousands of years. It employs various techniques to provide healing or relief to the ailing patients. Some minor ailments like common-cold, cough, fever, diarrhoea, skin complaints may be cured by the use of medicinal plant products.

The B.A/ BSc/ B.Com under graduate students are actually studying the environment and biodiversity, as a result of the interest created in them and are going in for attaining practical knowledge. This practice brings in the personal touch which encourages and motivates the beneficiary in a big way this practice makes the parents proud of their wards. The practice enhances student-staff -parent relationship and also helps to pursue their higher education. This kind practice has enhanced the brand image of the college. The medicinal plant products are used to the students suffering from common ailments.

Evidence of Success: Provide evidence of success such as performance against target and benchmarks and review results. What do these results indicate? Describe in about 200 words. The use of medicinal plants for curing various diseases has been documented in history of all civilizations. With the onset of research in medicine it was concluded that plants contain active principles, which are responsible for curative action is the witness an explosion in the popularity of natural products. A green eco-friendly campus, medicinal garden, attracts the learning students. Teachers and public and have invariably expressed their views during their visit. Sacred groove plants in the garden (Navagrahavana, Panchavativana) by seeing all the visitors expressed their

traditional medicinal practice and Ethical values. Household preparations with plant materials can supplement or substitute the conventional medicines with greater advantages without any side effects. Washing hair with plain detergents

Shikakai Acacia concina are considered to be highly superior to modern shampoos. It has been noticed that treating with medicinal plants extract for the various diseases like common cold, cough, and fever gave good results. A few of our students who were treated with medicinal plant products have also reported that, application of medicinal plants treatment have given good results with no side effects. The leaves powder Lawsonia innermis (Henna) are used to dye the hair, palms, soles of feet, finger nails to a bright orange colour used in Unani and Ayurvedic medicine. It has the advantage of not possessing any toxicity and is neither an irritant nor a sensitizer. Henna leaves are also having astringent properties. Aegle marmelos dried root powder gives significant result for fever. Use of medicinal plants and their practical utility for various diseases Sl .No Year Ailments Treatment No of Beneficiaries
